

Generic Risk Assessment Guide for Simple Stands at Moreton Show Saturday 7th September 2024

METHOD STATEMENT

The person as named in your booking is responsible for the safe construction and breakdown of the trade stand. They will be onsite for the majority of the time and will be able to be contacted on a mobile number in an emergency. The simple stand will consist of a table display/display equipment/a small gazebo that will be erected on the ground. There will be no or very few contractors involved in the construction of your stand. You will ensure all persons involved in the stand build/operation and removal will be fully briefed on the safe process as well as the rules of the showground as well that there are a number of high voltage cables overhead. Your materials will be transported by one vehicle to and from the showground by yourself or a courier. The stand erection and dismantling will be managed by your named person and will take no longer than 7 hours to complete. All lifting of goods will be supervised by your named person with the use of a trolley if appropriate. There will be no requirement to work at height. If electric is required, any equipment will have been recently PAT tested and you will connect to the power source provided by the show once it is available and make sure any trailing wires are made safe to trip hazards.

	HAZARDS AND RISKS	PERSONS AT RISK	CONTROL MEASURES
PRE-SHOW	Driving around the showground Manual handling Slips trips and falls Fire Contact with overhead powerlines	Staff on stand Fellow stall holders Stewards	Familiarise yourself with the showground layout and facilities. Follow instructions provided by show and stewards. Display your vehicle pass. Adhere to 5 mph speed limit on showground at all times. Briefing of all staff to safe working procedures. Alert to location/vicinity to high voltage overhead powerlines. Vehicles to be moved to car park as soon as you have been offloaded/finished setting up. Tools & power tools only used by those competent & trained to do so. When erecting/dismantling gazebos or structures taking account of the weather forecast – especially wind gusts. Ensuring any temporary structure (gazebos) etc are adequately anchored down for the forecast weather/wind. Safe working practices for manual handling to be used. Tidying up rubbish & set up material promptly once finished with Making sure your stand is set up by 08:00 and not dismantled until 18:00.
