Responsibilities of Security Contractor

As noted above overall responsibility for health and safety rests with the management committee. As the Bucks County Agricultural Association is a registered charity, the majority of tasks will be carried out by volunteers under the direction of the management committee, however because of the specialist skills and qualifications required for security work the association employs specialist SIA contractors (Richards Security) to patrol the site overnight leading up to the show and to work with the management team and stewards (and if necessary police officers CPSOs) to manage security/crowd issues on the show day. (See Crowd Control Policy) Reporting lines will be through central control.

Responsibilities of Traffic Management Contractors

Owing to the size and complexity of the issue of traffic management on Show Day the preparation of a traffic management plan and the actual management of traffic (including signage) has been allocated to competent contractors. These contractors will work with the management committee and representatives of the Police and Traffic Authority as appropriate. (See Traffic Management Plan)

Responsibilities of Exhibitors Contractors and Trade Stand Holders

All persons taking part in the operation of the show (exhibitors, trade stand holders, contractors etc. have a shared responsibility to ensure that they comply with the requirements of this safety policy and arrangements.

HEALTH AND SAFETY ARRANGEMENTS

Risk Assessments

It is a requirement of the Management of Health and Safety at Work Regulations 1999 that employers should identify and assess and control the significant risks generated by their undertaking. In order to fulfil this obligation the Bucks County Agricultural Association will carry out and record Risk Assessments for the overall Management of the Show. This duty also extends to contractors and stand holders.

In order therefore to fulfil this obligation all stand holders and contractors will also be expected to provide a risk assessment "appropriate to the level of risk for their particular undertaking". This Risk Assessment must cover the risk from fire, entry onto the showground and erection and dismantling of the stand if appropriate.

Stand holders will be provided with a risk assessment form and guidance on completion when applying for a pitch. This form must be available on Show day for random checks. Advice may be sought from the office or the Show's Safety Advisor if required.

Construction Design and Management Regulations

The Client, Principal Designer and Principal Contractor will be the Bucks County Show in conjunction with the Designers and Contractors listed below.

Pre-construction phase

Elements of the preconstruction planning for the Show commences almost immediately following the previous event. The various Landlords, local authority and traffic management departments, Bucks Police and the Fire Service will be consulted through the Safety Advisory Group (SAG). Contractors are appointed on their previous knowledge of the events industry and having worked with the Show. The Show attends Safety Advisory Group Meetings during the year. There are no significant changes to contractors for the 2024 Show.

Construction and dismantle phases

The key contractors for the site who will form the Project Team are the following:

Meadow Marquees, D&P Toilets, Tuckwell Contracting

Each of the above is responsible for their area of work and for communicating and co-operating with each other when

on site. As the Show builds there will be a number of other non-construction related contractors who will work with the above contractors.

The event is not a notifiable project under the CDM (Construction Design and Management) Regulations 2015

There are no public footpaths running across the Show site which require closure during the event. There is a public footpath which runs adjacent to the site. Public are known to walk across the site and the Land Owner will inform the public of the Show and its build via messages and signage. Also see section on traffic movement and pedestrians.

Exhibitors who book space only plots are considered as separate construction projects under the control of those exhibitors. In effect these traders rent a piece of land for the duration of the Show. Exhibitors are responsible for appointing their own competent contractors and for complying with the CDM Regulations.

All contractors contracted by the Show receive a copy of the site rules to enable them to complete an induction with their workers.

Sanitary arrangements are available ten days prior to the Show.

Bucks County Show monitors its contractors on an outcomes basis taking into consideration the key principles of the revised Regulations which are:

- To eliminate or control risks so far as reasonably practicable
- To ensure work is effectively planned
- To appoint the right people and organisations at the right time
- To make sure everyone has the information, instruction, training and supervision they need to carry out their jobs safely and without damaging health
- To have systems in place to help parties co-operate and communicate with each other and co-ordinate their work and
- To consult with workers with a view to securing effective health, safety and welfare measures.

The Show does have copies of the insurance certificates, risk assessments and where appropriate method statements for those contractors appointed above which are available in the Show Office.

Any accidents or incidents that occur on site must be reported to the Show Organiser.

Any working practices deemed to be unsafe will be stopped where identified and will not continue until safe systems of work have been applied. The above systems of work have worked well for a number of years and there have been no problems.

Electricity

Electricity at 240 volts, single phase, is supplied to several parts of the showground from the public supply and /or portable generators.

All electrical equipment must be approved by the Show's official contractor prior to use. Temporary low voltage distribution systems of 415 volts or less on the site will be subject to the 'Electricity at Work Regulations 1989 and associated legislation'.

Anyone who provides electrical apparatus for their own or anyone else's use must, before it is connected to the supply, ensure that it is maintained as required by the Electricity at Work Regulations 1989 and if appropriate arrange for its inspection / test by a competent person or the Show's official contractor.

Spot checks will be carried out by show officials and any equipment found to be faulty will be confiscated.

All equipment shall be connected to the supply through a Residual Current Device (RCD) and all cables and connections where not protected by a weatherproof structure shall be of such construction, or protected as necessary to prevent danger arising from exposure.

Socket outlets should not be overloaded and extension leads used only where really necessary and should not create a trip hazard.

Generators

Any generator used on the show ground must be notified to the Secretary and may be subject to random checks throughout the period on site. Generators should be sited on a secure platform away from all flammable materials. Fuel for generators must be stored in suitable sealed containers out of direct sunlight. Quantities of fuel must be kept to a minimum. All installations must comply with relevant legislation and guidance.

Underground and Overhead Electrical Services

Exhibitors are warned of the danger from the distribution of high and low voltage systems throughout the show ground and are asked to check on their position both above and below ground before erecting marquees, stands, flagpoles etc. Trade stands that are sited above the main underground cable will have notification with their badges. A plan showing the location of this cable is available for viewing in the Secretary's Tent. Trade stands must liaise with the Secretary as to whereabouts of any "extensions" on their stand.

Underground Water Services/Potable Water

The showground is supplied with potable water via a system of permanent underground pipes supplemented with a temporary system which is installed by a competent plumbing contractor in the weeks leading up to the show. In order to ensure the water is of a suitable quality, guidance will be taken where appropriate from BS 8551 (The Provision and Management of Temporary Water Supplies (Code of Practice)) and appropriate water quality tests will be carried out prior to the show day by a competent contractor. A plan showing the location of underground water pipes is available for viewing in the Secretary's Tent and it is the responsibility of all contractors, exhibitors and stewards to make themselves aware of these.

The person in charge of the catering operation is to make sure that staff who handle food are supervised and instructed and/or trained in food hygiene in a way that is appropriate for the work which they do.

It is recommended that a food hygiene certificate is held by one or more staff as this will show that the persons handling or preparing food have knowledge of food hygiene and allergens.

All caterers should be aware that Inspectors of Environmental Health Departments will make inspections prior to, and during events, to ensure that food operators understand and comply with the relevant legislation.

Temporary Structures

All temporary structures including marquees, buildings, information boards, fences and gates must be soundly constructed, erected and safe for their intended purpose and comply with any relevant current guidance. (Standard guidance is available in the Institution of Structural Engineers document "Temporary Demountable Structures: Guidance on design, procurement and use.") **Exhibitors must give regard to the stability of their exhibits and ensure that they are secured against collapse.**

Where appropriate (e.g. in the case of marquees etc.) contractors will be asked to provide details of safe wind loading to enable suitable action to be taken in the case of adverse weather. All marquees under the control of the show committee are erected by "Meadow Marquees" and a representative from this company is available on site to deal with any problems or give advice for the duration of the show.

Hazardous Substances

No pesticides or other substances hazardous to health should be kept on show stands; exhibitors should display only new, empty containers.

Fire Prevention

An overall fire risk assessment of the showground is carried out by the Show's Safety Advisor as required by the Regulatory Reform (Fire Safety) Order 2005 and all structures provided by the Agricultural Association (Member's Marquee, Cattle Marquees etc.) will be provided with appropriate fire extinguishers and signage. However, exhibitors, in particular those providing their own tentage or temporary housing must also as part of their overall risk assessment assess the risk from fire, and must bring their own fire extinguishers on to the showground at the time of setting up, and keep them on the stand for the duration of the show. Exhibitors bringing their own tentage must ensure that it has been treated with a suitable fire retardant, and in the case of a large marquee, a plan showing all fire exits must be submitted for approval by the Health & Safety Adviser.

Fire extinguishers must be sited in a prominent position and in full view.

Exhibitors must have available extinguishers which are most suited to the risks.

Exhibitors should note that fire extinguishers will be subject to random checks and any stand without a suitable extinguisher will be closed down.

All static exhibits must be erected in a way that ensures they do not present a risk to any persons during the event (including erection and dismantling).

All exhibitors must take into account the requirements of the "Work at Height Regulations" when erecting or dismantling structures.

Machinery

Specific risk assessments must be provided by the exhibitor for any operation or demonstration of machinery.

Machinery must only be operated or demonstrated in areas fenced off from the public. Operators must cease their activities should any person encroach into a danger area. Particular care must be taken to assess and control the risk to persons from materials which may be ejected from machines.

Plant and machinery must only be operated and demonstrated after ensuring that adequate precautions are taken to protect the operator and bystanders. Operators will be told that unsafe operation will not be allowed and may lead to possible legal action by the relevant enforcing authority.
