Tractor Triathlon

Put your tractor handling skills to the test in the Tractor Triathlon – a timed, three-stage challenge that rewards speed, precision and control.

Competitors will tackle three disciplines:

Trailer Reverse Challenge – Hitch & reverse a trailer accurately through a designated gate
Water Carry Challenge – Navigate a course while transporting an IBC of water, demonstrating smooth machine control while minimising water loss.
Stillage Stacking Challenge – Safely stack stillages using the tractor loader

Each competitor's overall time will determine their result, with penalty points added for inaccuracies throughout the course, making precision just as important as speed. The competitor with the fastest adjusted time will be crowned the Tractor Triathlon Champion.
