### It's never the right time to need a new knee! However, at Nuffield Health you can fit your treatment around your work, rest and play.

At Nuffield Health Plymouth Hospital, we know that hips and knees are designed to last a lifetime, but injury, accidents and osteoarthritis can leave your joints worn out and very painful. Hip and knee joints need to function well to perform the most basic and everyday movements, including standing, walking, running, bending and stretching.

Wear and tear can happen naturally over time and in some cases surgery, including hip resurfacing, hip replacements and knee replacements, may be the best course of action.

Farming often involves significant exercise such as walking and heavy lifting over long hours – this can contribute to the degeneration in hips and knees. We often operate on patients that work in the farming industry and a common theme we hear back from this group is that time is precious, and timing is everything! By choosing to go privately with Nuffield it allowed them to have their operation at a time that was convenient to them and their farming schedules. Whether it be at the end of the lambing season or just after the harvest, our patients can pick exactly when they want their operation!

Positioned in Plymouth, Nuffield Hospital is conveniently located for patients from all over Devon and Cornwall.

At our Plymouth Hospital we have orthopaedic consultants covering all areas of the body, so you can be assured that we have the right expert on hand to help you.

We take great pride in maintaining your privacy and dignity at all times, ensuring you're as comfortable and relaxed as possible throughout your stay with us in Plymouth.

### Four Signs you may need a new knee

### 1. Pain points

### Pain with activity.

Pain that comes on with activity and limits what you can do is a clear signal to seek help.

### Delayed pain.

Pain that comes on after activity, also known as 'payback pain', can be a warning that your knee isn't performing as it should.

### Pain that interrupts sleep.

If you find knee pain prevents you from falling asleep or you wake up because of pain caused by your movements during sleep – talk to someone about it.

### 2. Visual changes

The way your knee looks can be just as important as the way it feels. Changes in the appearance of your knee can be a sign of inflammation. If your leg swells or looks markedly different from the other, then it may be time to speak with a specialist.

### 3. Limited movement

Difficulty sitting down in a low seat such as in a car or cinema because your knee refuses to bend is a common sign of osteoarthritis. Seizing or catching of the joint during movement can also indicate advanced deterioration or that a loose bone fragment has become lodged in the joint.

### 4. Lifestyle limitations

Any symptom that prevents or limits your ability to do the things you love, is cause for concern. With a little help, a bad knee doesn't have to impact your quality of life.

The Judges may withhold any prize where there is evident want of merit. Where there is only one Exhibit or pen of Exhibits shown in a Class the Judges may award the first, second or third prize according to the merit of the Exhibit or Exhibits exhibited. **No Second Prizes** will be awarded if there are not four entries in a class, unless the Judges shall recommend such Second or Third Prizes on the ground of **Special Merit**.
